

## Envision CAD Manager

### March 2009

#### In The News

##### **Envision CAD Manager - InRoads Module**

Envision has developed a new application for managing CAD resources. Anyone who manages InRoads resources (XIN file) understands the complexity and time consuming undertaking when managing these settings and preferences. While some tools are provided by the software vendor to assist in managing these resources, we have taken the next step by integrating InRoads Styles, Named Symbolologies and CAD workspace resources into a single application. This allows you to manage, verify, quantify, build, and QC an XIN file with ease. You can choose to purchase this application or have us review your data as a service.

##### **Autodesk Developer Network (ADN)**

To better serve our clients we are excited to announce a strengthening in our partnership with Autodesk by joining the Autodesk Developer Network (ADN). Being part of the ADN will give our developers and courseware authors more access to resources at Autodesk. Please **contact us** to find out how we can help your Autodesk software automation and training needs.
