

Other Tools in the EnvisionCAD Toolbox

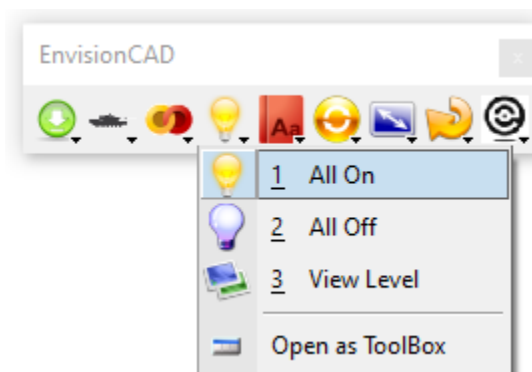

Note: menu options may appear different as more freeware tools are added

Cell Libraries

Selecting any of these cell libraries will attach the library to the design file as the active cell library.

Levels

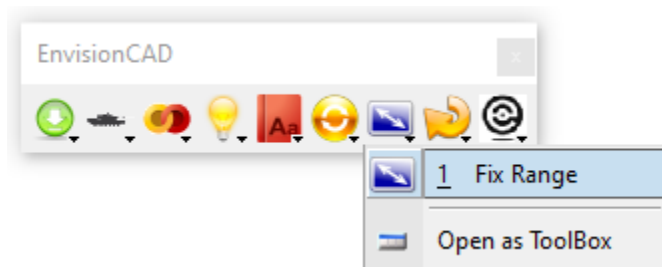

All On – Issues the **ON=*** key-in command to turn on the display of all levels in the active view

All Off – Issues the **OFF=*** command to turn off the display of all levels in the active view

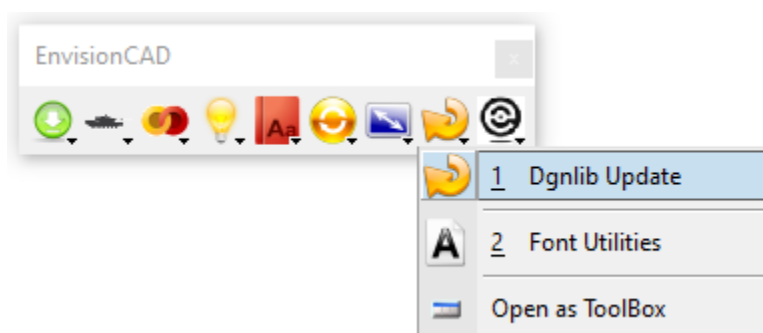

DGN Cleanup

Fix Range – Loads and executes the Bentley Fix Range tool delivered with MicroStation to automatically adjust the range block values for each element

Resource Management

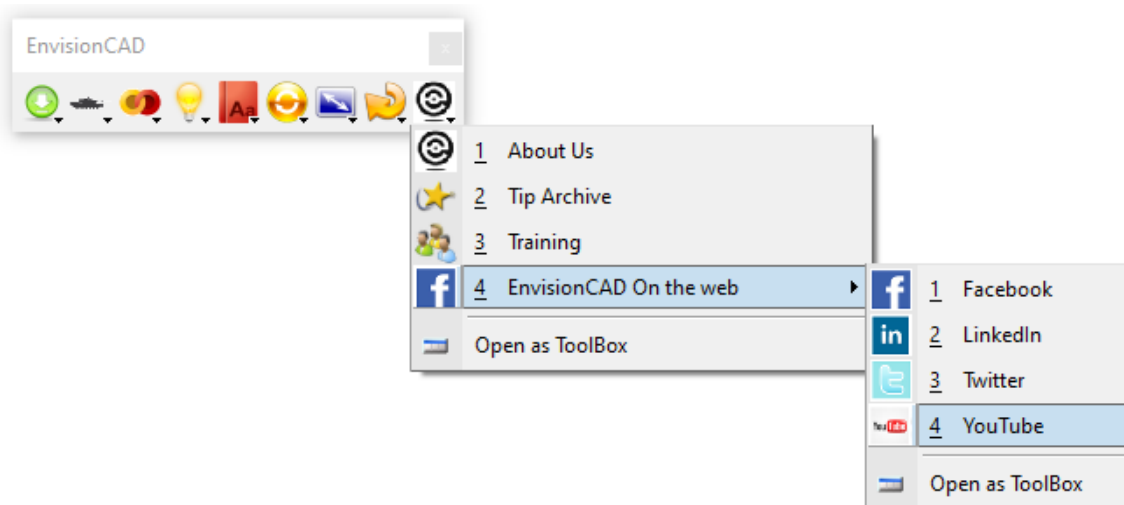

Dgnlib Update – Issues the **DGNLIB UPDATE ALL** key-in command to sync the resources in the active design file with all of the referenced dgnlib files.

Font Utilities – Loads and executes the Bentley Font Utility tool for editing font library resource (.rsc) files.

EnvisionCAD Resources

These options take you to EnvisionCAD's online information and resources.

Dive even deeper in to the subject matter with classes, training books, and webinars.
