

MicroStation VBA Macro: Send to Back

Note: menu options may appear different as more freeware tools are added

Key-in Command: VBA RUN [SendToBack]SendToBack

This macro allows the user place the selected elements in the back (bottom) of the display order. This tool performs the opposite action as the MicroStation Bring to Front tool.

Tool Options:

- **Enable legacy draw order** – For 3D models toggling on this option allows the selection of a Display Type that overrides the Z coordinate as the basis for determining the element display order.

The elements that are to be sent to the back of the display order must be selected prior to clicking the **OK** button.
